\Rightarrow We get the same output dimension for $S=1$ and $P=1$

b) - We will get 2 Activation Maps (1 per filter)

- Dimension of output volume: (with $W=4, H=4, w=2, h=2$)

$$O_w = \frac{W-w+2P_w}{S_w} + 1$$

$$O_H = \frac{H-h+2P_H}{S_H} + 1$$

for $S=1$ and $P=0$ we get: $O_w = \frac{2}{1} + 1 = 3$ ($= O_H$)

$$\Rightarrow \underline{3 \times 3} \times \underbrace{2}_{\text{nr. of filters}}$$

for $S=2$ and $P=0$: $O_w = O_H = \frac{2}{2} + 1 = 2$

$$\Rightarrow \underline{2 \times 2 \times 2}$$
